Catching your first fish will take you on amazing new adventures. You will explore lakes, rivers, streams, and oceans. The stories that come from these adventures will be the foundation for lasting friendships and fuel for conversation around campfires, holiday meals, and dinner parties.

We believe everyone should catch a fish, that it should be fun, fast, and with minimal frustration. We have spent the time to ensure your next adventure is a success by putting together a guided trip experience. We have included all the best gear, foundational skill tutorials, and fishing secrets to help you make your first catch. Get ready to have a ton of fun, make amazing casts, and go on an exciting adventure to catch your first fish.

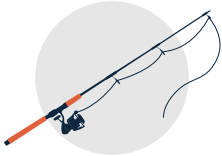

STEP ONE

GET THE AWESOME GEAR

We have "hooked you up" with the high-quality tackle that's fun and easy to use. Listed below are some of the items you will find in your box.

Gear Fishing

Rod

Bobbers

Split shots

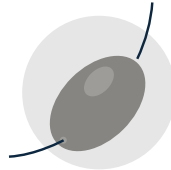

Lures

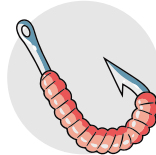

Jigs

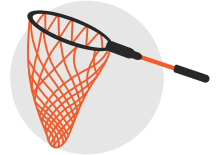

Reel

Sinkers

Worm hooks

Net

Fly Fishing

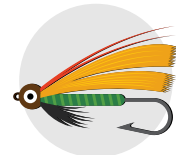

Rod

Floating line

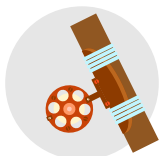

Tippet

Wet flies

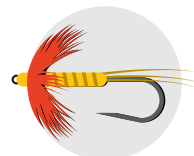

Fly float

Reel

Tapered leaders

Dry flies

Nymph's

STEP TWO

GET GOOD WITH YOUR GEAR

It's important you are confident with how your gear works. Take the rod out of your case along with your tackle box, and let's get started.

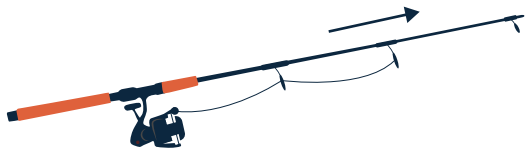

First: Put The Rod Together

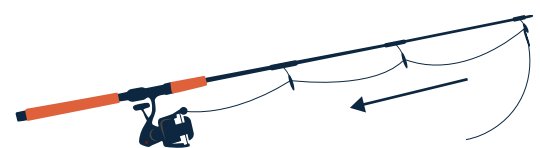

Place the bottom and top sections together and align the eyelets.

Place the line under the bale of the reel to engage the reel.

Thread the line through each eyelet until it comes out the top of the rod.

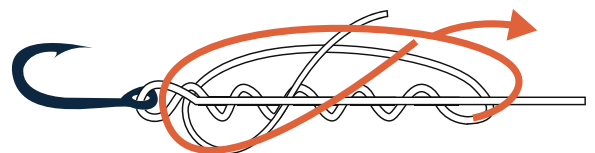

Pull out extra line, so it goes down and meets up with the reel.

Second: Tie On The Hook (Improved Clinch Knot)

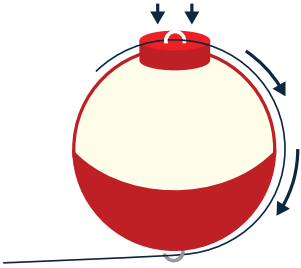

Pull line through the eye and double back making five turns around the standing line.

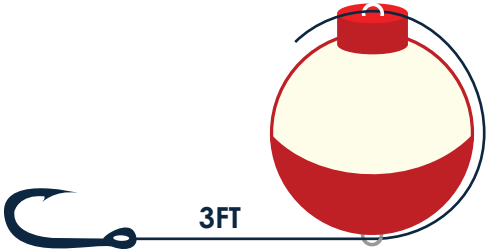

Holding coils, pull the end through the first loop and then through the big loop. Slide tight, and clip ends.

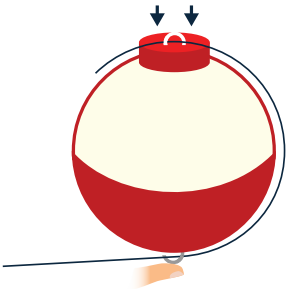

Third: Put On The Bobber

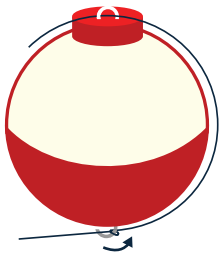

Press the red button on the top of the bobber, slide line through the hook on the bottom of the bobber.

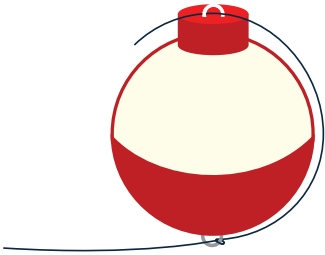

Place the bobber three feet up the line from the hook.

Place thumb under the bottom hook on the bobber and press down top button.

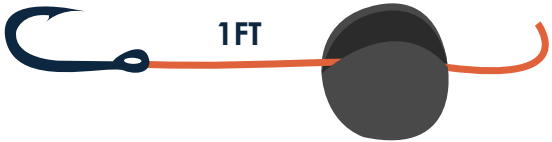

Make a half loop and slide the loop under the hook of the bobber and then release.

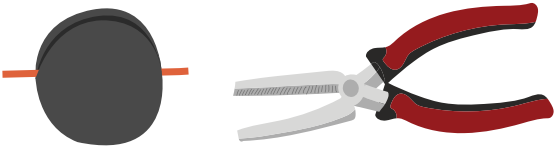

To adjust your line length as needed.

Fourth: Put On The Split Shot (Weight)

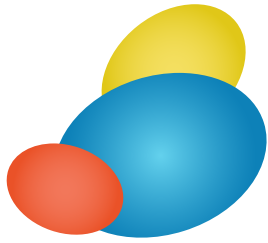

Slide the mouth of the split shot onto the line one foot above the hook.

Using your needle nose pliers crimp the split shot securely to the line.

For more weight add another split shot.

Fifth: Put On The Bait

Powerbait

Scoop out a dime size glob of power bait roll it into a ball and pinch it onto the hook around the middle of the hook.

Salmon Eggs

Pick out a salmon egg and place the hook through the middle of the egg.

Add enough eggs to cover the lower half of the hook.

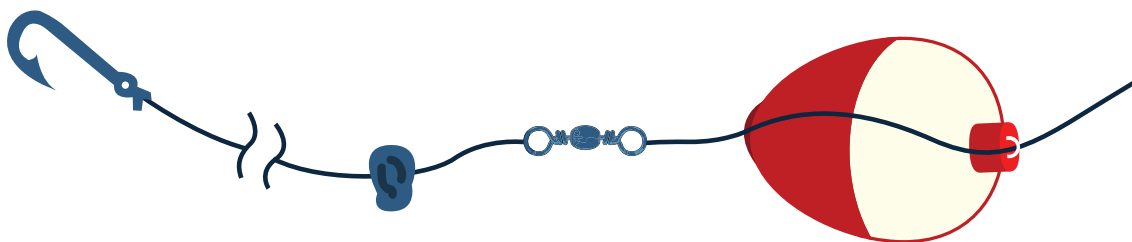

Nightcrawler

Pick out one healthy nightcrawler and place the hook once through the front of the worm and once through the ring are of the worm.

The nightcrawler should have a longer dangling tail that wiggles and attract fish.

Sixth: Your complete setup

Starting at the bottom is your hook, the line in-between the hook and swivel is your leader. One foot up from your bait is your two split shots. Two or three feet from the swivel is your bobber.
